aerode®

Software for optical dosimetry

THE MOST COMPLETE, FLEXIBLE & PROFESSIONAL TOOL FOR INDUSTRIAL DOSIMETRY !

for your facility qualifications and routine monitoring

suited for use with all optical dosimeters available

▶ SOFTWARE

- **totally controls dosimetry equipments** (settings of equipment's parameters, readings, storage of data, SQL, Excel,...)

- performs **dosimetry system calibration**, fit, residuals and uncertainties
- **PQ (Product Validation)** loading pattern, plans definition, report edition...

- performs **equipment verifications** (absorbance, wavelength, thickness) needed to certify the absorbed dose measurements
- customized to **client specific requirements**

> Software is validated and meets all quality assurance requirements according to FDA 21 CFR part 11, ISO, EN, ISO/ASTM... guidance or standards.

aerode IS DESIGNED TO PERFECTLY INTEGRATE YOUR PLANT NETWORK.
